# MX-ONE™ TELEPHONY SERVER TTY/LINUX SYSTEM MANAGEMENT

The MX-ONE™ Telephony Server TTY /Linux System Management course familiarises delegates with the programming principles of the Aastra MX-ONE™ Telephony Server telecommunication system using the command language, enabling them to manage and facilitate changes and additions within their organisation. The course explores the system structure, user facilities and implementation and management of extension moves and changes using both TTY/MML Commands (Man Machine Language) and Linux Commands.

This course can be carried out on Customers own sites, where the Instructor will help the Administrator configure some of the applications features to their requirements.
